

European Research Council
Established by the European Commission

ERC Virtual Venture Fair

ERC has set up an online pilot platform, the “Virtual Venture Fair”, to ease connections between ERC funded scientists and possible investors. The platform is set up for both the researchers that were awarded an ERC Proof of Concept grant and thus have taken the initial steps to convert their research results into potentially marketable uses and the possible investors who want to connect with the best researchers in Europe. ERC funded researchers and investors can contact the ERC for more information on the platform: erc-virtual-fair@ec.europa.eu
