HumMingBird: Enhanced Migration Measures from a Multidimensional Perspective

HumMingBird aims at responding to the needs by improving understandings of changing nature of migration flows and the drivers of migration, by analysing patterns, motivations and new geographies, forecasting emerging and future trends.

- 10 countries: BE, CH, DE, ES, IT, NL, NO, SE, TR, UK
- 16 partners
 - Research parties/universities (Sociology, anthropology, communication science, political science, data science, statistics, telecom engineering, computer sciences)
 - SMEs, private companies
 - NGO networks
 - European Research Infrastructure Consortium (ERIC)

5 Key Elements of Successful Projects

- Clear goals and scope
- Timely planning
- Communication
- Committed partners
- Engaged stakeholders

A drawing works better than long explanations...

... or maybe not

To summarize...

Not one, but several parallel and complementary systems: tailored to “local” policy needs

Communities : Higher education and fundamental research (universities and research councils)

Regions : Support to industry, innovation policy

Federal state : Global framework, R&D tax incentives, space research (incl. support to companies), dedicated strategic programmes

Belgian R&I Policy: Background

Belgium is a federal country

1. The **Belgian Communities/Regions** have large autonomy;
They are the primary responsible actors for Science, Technology, Education and Economy Policies
→ control over main levers for innovation policy
2. The **Federal level** remains an important actor in STI policy:
It provides financial support for STI in support of its own competences in case of need for a homogeneous approach, in support of aeronautics & space within an international context (funding programmes), coordination, ...
Provides general incentives via fiscal measures (taxes)

Belgian R&I Policy: actors

- French Community: DGESVR

- Federal authority: BELSPO

COOPERATION AND CONSULTATION

The Interministerial Conference on Science Policy (CIMPS-IMCWB)

- The International Cooperation Commission (CIS)
- The Federal Cooperation Commission (CFS)

HORIZON EUROPE

Horizon Europe, the next framework programme for research and innovation, will replace Horizon 2020 as from 2021 onwards.

Horizon Europe is implemented by the European Commission assisted by **Programme Committees (PC)**. Programme Committees provide opinions on the Work Programmes.

Programmes committees :
European Commission + Member States + Associated Countries

BELGIUM's representation in PC

Step 1 : Find a consensus on a Belgian position : CIS and sub-groups.

Where can I get support ?

Case 1

I am a researcher or project leader (from University, Company, Research Center,...) and I have an idea of project, I am looking for partners and/or funding...

*The network of **National Contact Points (NCPs)** is the main structure to provide guidance, practical information and assistance on all aspects of participation in Horizon 2020.*

WHAT

#HorizonEU

National Contact Points (NCPs) are appointed in all Member States and Associated Countries, but also in many other countries.

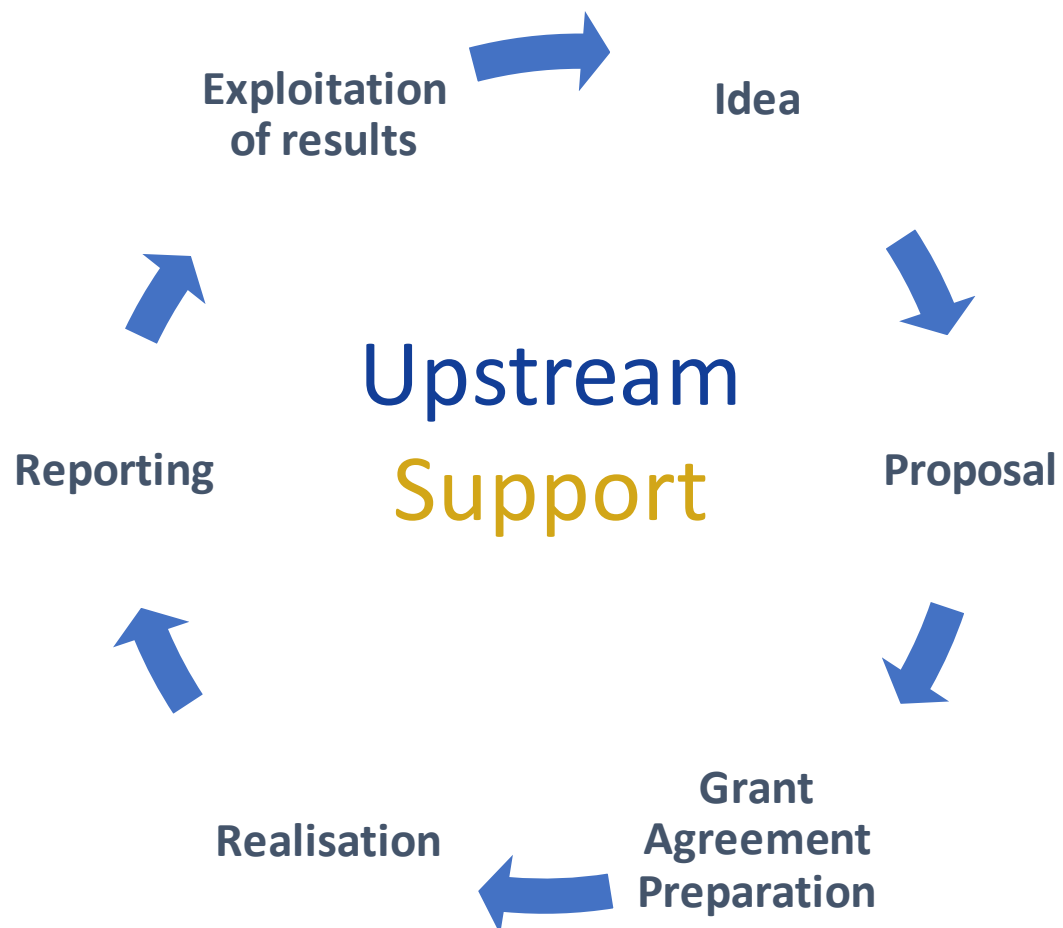

Our tasks in the Framework Programmes:

- Raising awareness about the programme
- Guidance on choosing relevant H2020/Horizon Europe topics and types of action
- Advice on administrative procedures and contractual issues
- Training and assistance on proposal writing
- Distribution of documentation (forms, guidelines, manuals etc.)
- Assistance in partner search
- Signposting to other networks
